PROJECTS

Portfolio, *https://portfolio-kohl-iota-22.vercel.app/* ⧉
- Developed a modern, responsive portfolio website using React 18.3.1 and Vite to showcase frontend development work.
- Implemented a clean dark mode interface with smooth animations and modal-based project details for enhanced user interaction.
- Structured clear sections for projects, skills, and contact, ensuring intuitive navigation across all devices.
- Utilized custom CSS variables to maintain consistent theming throughout the site.
- Integrated EmailJS to enable functional and secure form submissions directly from the website.

The Modern Look, *https://the-modern-look.vercel.app/* ⧉
- Built a modern e-commerce platform using React, with responsive design and seamless performance across devices.
- Created interactive product listings and dynamic single-page views for products and blog posts, featuring detailed content, reviews, and responsive design.
- Integrated a shopping cart system managed with Redux Toolkit and used React Router for multi-page navigation.
- Applied custom CSS styling throughout the site for a clean, modern, and user-friendly UI/UX.

Weather App, *https://weather-git-main-jaydipbelas-projects.vercel.app/* ⧉
- Developed responsive weather application using React19, offering real-time weather updates any searched city.
- Integrated WeatherAPI.com ⧉ to fetch current temperature, humidity, wind speed, visibility, and conditions.
- Designed an intuitive user interface with weather icons and clear data presentation for a seamless experience.
- Showcased strong API integration skills and modern frontend development best practices.
